Welcome Message

Dear colleagues

The college conference this year 2013 came to express a real desire for change. We will try hard to make the conference a forum for all sections of the College where we see each other, squeeze the hands that achieve goals and criticize each other in constructive manner.

Also we will review the faculty achievements in medical education, training and research activities of various departments. Students will be actively involved in several activities and presentations.

Beside the regular sessions, the conference will include workshops on up to-date educational, practical training and evaluation subjects. As a side activity we have the first Job fair meeting at the next 2 days after the conference. The success of this conference depends mainly on your participation. We are looking forward to meet you all to exchange opinions and experiences. We hope a successful and fruitful conference.

Sincerely
